

#### Effective Date

This procedure is effective from 2024-03-20.

#### Storage Temperature

Store the reference standard at -70°C.

#### Batch Size

Manufacture in batches of 2,000 mg per lot.

#### Reference Standard Weighing

Weigh 55 mg of Batch 13 reference standard for the assay.

#### Container Specification

Dispense the solution into a 10 L amber glass vial.

#### Calibration Frequency

Calibrate the analytical balance every 30 days using a 200 g reference weight.
