

Effective Date

This procedure is effective from 2024-01-15.

Storage Temperature

Store the reference standard at -20°C.

Batch Size

Manufacture in batches of 1,000 mg per lot.

Reference Standard Weighing

Weigh 50 mg of Batch 12 reference standard for the assay.

Container Specification

Dispense the solution into a 10 mL amber glass vial.

Calibration Frequency

Calibrate the analytical balance every 30 days using a 200 g reference weight.
