

Scope

This procedure applies to the manufacture of Product X tablets at Site A.

Responsibilities

The Quality Assurance Manager shall review and approve all batch records prior to release.

Materials

The active ingredient shall be stored at 36°F to 46°F prior to use.

Assay Acceptance Criteria

Assay acceptance criterion: 98.0% to 102.0%.

Sample Preparation

Weigh 20 mg of sample and dilute to 200 mL with mobile phase.

Sample Analysis

Filter the sample through a membrane, then inject 20 microliters into the HPLC system and record the chromatogram.

Effective Date

This procedure is effective from 15 Mar 2024.

Reference Documents

Refer to the Analytical Validation SOP for detailed calculation methods.

Storage and Shelf Life

Material shall not be used beyond 24 months from the date of manufacture.

Training Requirements

All analysts performing this procedure shall complete method-specific training prior to independent testing.

This marks the end of the procedure.
